

Type 1189 Low Pressure Bellows Gauge

- Available in 4½" and 6" dial size
- Bellows-actuated mechanism
- Three bellows materials
- Easily adjustable micrometer pointer
- Aluminum case
- All-stainless steel movement

Ashcroft® bellows gauges are used for measuring low pressures from 10" H₂O to 10 psi pressure as well as vacuum and compound ranges. Coupled with their sensitivity, these gauges have a rugged design for process and industrial applications.

TEMPERATURE LIMITS

	Ambient	Process	Storage
Dry	-20/150°F (-29/66°C)	-20/150°F (-29/66°C)	-40/150°F (-40/66°C)

Note: Other than discoloration of the dial and hardening of the gasketing that may occur as ambient or process temperatures exceeds 150°F, non-liquid-filled gauges with standard glass windows, can withstand continuous operating temperatures up to 250°F (121°C). Accuracy at temperatures above or below the reference ambient temperature of 68°F (20°C) will be affected by approximately .4% per 25°F. Gauges with soft soldered joints will withstand 250°F (121°C) for short times without rupture, although other parts of the gauge will be destroyed and calibration will be lost. For continuous use and for process or ambient temperatures above 250°F (121°C), a diaphragm seal or capillary or siphon is recommended.

PRODUCT SPECIFICATIONS

Model Number:	1189
Accuracy:	2%-1%-2% ASME Grade A
Case Style:	Solid Front (dry only)
Case Material:	Aluminum, Black Epoxy Coated
Dial Size:	4½" (45) and 6" (60)
Dial Material & Color:	White Aluminum with Black Markings
Ring Type:	Polypropylene, Black, Threaded, Reinforced
Bellows & Socket Material:	Brass, 316SS, Monel Joints soldered
Connection Size:	¼ NPT, ½ NPT
Connection Location:	Lower (L)
Range Limits:	10/IW Vac to 10 psi
Mounting:	Stem, Flush & Surface
Movement:	416 SS
Pointer:	Micrometer Adjustable
Window:	Glass
Warranty:	1 Year

OPTIONAL FEATURES

Flush Mounting Ring: X56
Shatter Proof Glass Window: XSG
Acrylic Window: XPD
