## Success Story

July 2016

A global leader in complete bathing solutions, chooses the LF 3000<sup>®</sup> push-in fittings and Advanced PE tubing.

Market: Processing

ENGINEERING YOUR SUCCESS.

The company chooses the LF 3000® fittings and LIQUIfit® Advanced PE tubing for its innovative system.

## Application

The group has a complete premium bathing solutions, and also provides ranges of showers, bathroom supplies, flushing systems, wellness products, concealed cisterns and water heaters.

More than 50 000 pieces of its innovative system are sold a month, an hydraulic pump booster placed above the toilet, reducing water consumption and guaranteeing maximum efficiency.

For this system, the customer needed an extremely reliable and compact connection solution (tube and fitting), with the highest sealing performance on the market.

## Solution

After a worldwide bench mark and demanding qualification process, the company has chosen the LF 3000® push-in fittings range and the LIQUIfit® APE tubing as they represent the only solution capable of meeting all customers expectations:

- best compactness
- best resistance to the conditions of use
- best sealing
- simplified assembly possible
- circuit identification circuit for easier maintenance operations

Working Temperature: 23°C

Working Pressure: 2 bar

Compatible Fluid: water and air

## Regulations

DI: 97/23/EC

ISO14743

Water resistance

3199 00 01 52 & 3199 06 55

1015Y06F04 & 1030Y06F04

## Key Success Factors

- Compactness
- Best resistance to pressure and sealing
- Exceptional quality-price ratio
- Only solution that covers all the customer's needs
- CAD drawings available to facilitate circuit design
