

Pressure and Restriction Gauges For Fuel Products

Racor is pleased to announce the following improvements to the Fuel Pressure and Restriction Gauge product family:

Improvements include:

- Stainless Steel case and face increased from 2.0 inches to 2.5 inches diameter for easier reading.
- The improved cases feature a pressure relief valve to adjust to ambient barometric pressure changes.
- Gauges with acrylic lenses upgraded to polycarbonate.
- Needle stops replaced with internal locking mechanism to prevent damage due to an accidental overpressure.
- Internal sealing at the fitting, lens, and pressure relief valve reduces the likelihood of internal contamination by splashing fluids.
