

Minimal fluid loss during disconnection. NSA couplings have minimal pressure drop and no inclusion of air or dust during connection.

Dry-break poppet valve for reduced spillage during connection/disconnection. Light weight due to aluminium construction. Push-Lok connection for fast assembly - time saving.

## Working Temperature\*

-50°C up to +175°C (Fluorosilicone) depending on the medium.

\* For temperatures below -50°C and over +175°C and depending on the medium, other seal variants (NBR, FKM, EPDM, FFKM) are available.

## **Working Pressure**

20 bar

## Material

Coupling: Anodized Aluminium Plug: Anodized Aluminium Seals: Fluorosilicone

# **Technical Description**

Dead space volume DN 10: 0,08 ml Dead space volume DN 12: 0,1 ml

Connecting Force 0 bar DN 10:  $100\ N$  Connecting Force 0 bar DN 12:  $167\ N$
