

In the event of incorrect selection, incorrect and improper use, quick connect couplings and their accessories may cause damage to property and personal injury!

The consequences of incorrect selection, incorrect and improper use may be:

- Ends of hoses, coupling and plug components or accessories may fly around
- Contact with fluids that are damaging to the health, toxic, cold or hot
- Leakage of fluids under high pressure
- Explosion or combustion of leaking, carrying and surrounding fluids
- Injuries and damage caused by uncontrolled movements of system parts through drop in fluid pressure

Parker Instructions for use give instructions on the application, installation, maintenance and operation (coupling / uncoupling) of Parker quick connect couplings and of the accessories.

In addition, the series-specific notes on the following fields on the catalogue page of each Parker series must be observed:

- Technical description
- Advantages
- Applications
- Safety instructions (series)
- Working pressure
- Working temperature

Parker accepts no responsibility whatsoever for the selection, application or maintenance of any products. The buyer has sole responsibility for the correct selection, application and maintenance of Parker products.

The information contained in these Instructions for use may not be interpreted as explicit or implicit warranties or guarantees with respect to the products and services described here or their use or suitability. We reserve the right to modify or improve the design or the technical data of these products without notice and at any time.

All persons authorised to select and use Parker quick connect couplings must be informed of the contents of these safety instructions, as well as of the contents of the Instructions for use and notes on the above-mentioned areas.
